

STRENGTH IS THE CORNERSTONE OF ANY FITNESS PROGRAM.

NAUTILUS® IS STRENGTH.

Safe, productive and time-efficient results achieved only on Nautilus® strength machines dramatically and forever changed how people exercised in the seventies.

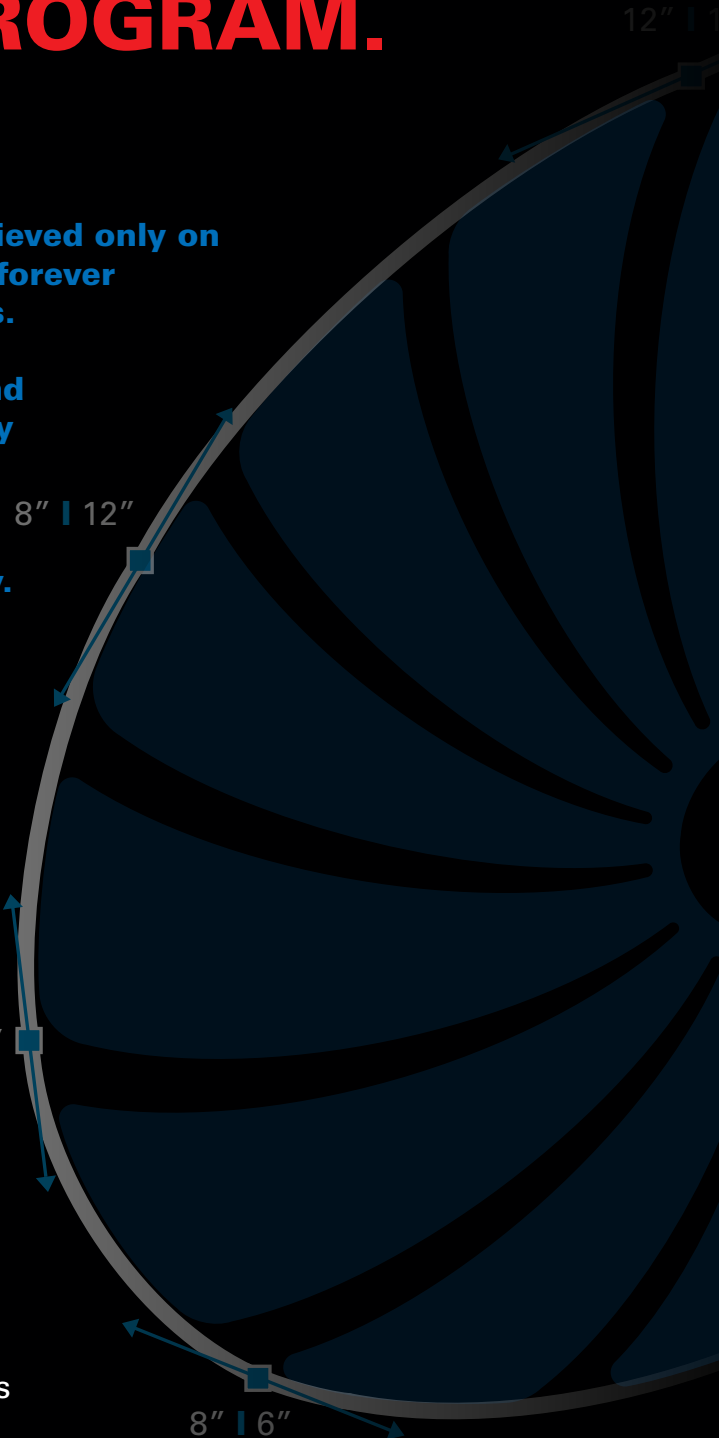

Today, we continue to do it better than ever and strive to improve upon what many have already called "perfection in biomechanics".

With over 31 international patents, we continue to revolutionize the strength industry. It is who we are. It is what we live for.

IF YOU DON'T MIMIC THE SPECIFIC MUSCLE'S STRENGTH CURVE EXACTLY, YOU JUST WASTED YOUR MONEY. PERIOD.

Since 1970, every Nautilus® strength machine has been designed around the biomechanics of body movement. Each movement requires a very specific strength curve and range of motion. Therefore, a specific set of cams is designed for each and every Nautilus® strength machine.

Other manufacturers may fool you into thinking that their so-called cams, levers or pulleys mimic the body's strength curve, but the truth is they don't. And the truth is many use the same cam on every machine to save money that cost you results, injuries and members.

FOR YOUR PROTECTION, THIS EQUIPMENT HAS BEEN TREATED WITH mPale® ANTIMICROBIAL.

GOOD. BETTER. BEST.

It is our guarantee that *every* line of strength equipment we manufacture is biomechanically superior to any one of our competitors.

NEW! NAUTILUS® NOVA.

*Uncompromising Craftsmanship.
Price-Conscious & Compact Package.*

The Nautilus® NOVA line offers you the same commitment to biomechanical and mechanical excellence as the rest of the Nautilus® strength lines in a more affordable package. The modern streamlined design minimizes floor space requirements and is available in single and dual stations.

NEW! NITRO EVO.

*Updated Sleek Look.
Improved Function.*

With over 150,000 units in the marketplace, the Nautilus® Nitro series is one of the most popular strength lines in the world. How do you take the best and make it better? By adding a patent-pending 5 lb. weight stack, marine-grade and contoured upholstery, partially-enclosed sleek, new tower shield with a 5.5" opening.

NAUTILUS ONE®.

*Revolutionary Technology.
Unprecedented Results.*

Nautilus ONE® Strength Equipment combines a revolutionary new weight stack technology with the most intuitive and user-friendly selection method ever created: a Dial. With a sleek, modern design combined with our patented Optimal Strength Curve Technology® you have a line that defines performance. No guide rods and fewer pulleys also give a smooth, plate-loaded feel from a selectorized machine and make ONE virtually maintenance free.
